MANUAL SYSTEM

SLIDING GLASS SYSTEM

NAME:

DATE: **01-03-2024**

REFERENCE NAME: **ESTRES KING DAVID REFGLOSS SYSTEMS**

OPERATING MECHANISM

The sliding glass system is a manual system which slides to the right and left. It is also called "fan system" due to the fact that the glass sheets overlap when sliding, just like a fan.

FINANCIAL OFFER

SLIDING GLASS SYSTEM

This system is perfect for small terraces or balconies, because it offers protection against the wind and cold, and also creates a soundproof barrier and keeps away the urban noise.

The glass sheets are easy to slide and handle, being easy for the user to open the space whenever needed. You can have an open space in the summer and be protected from the cold in the winter.

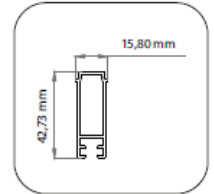

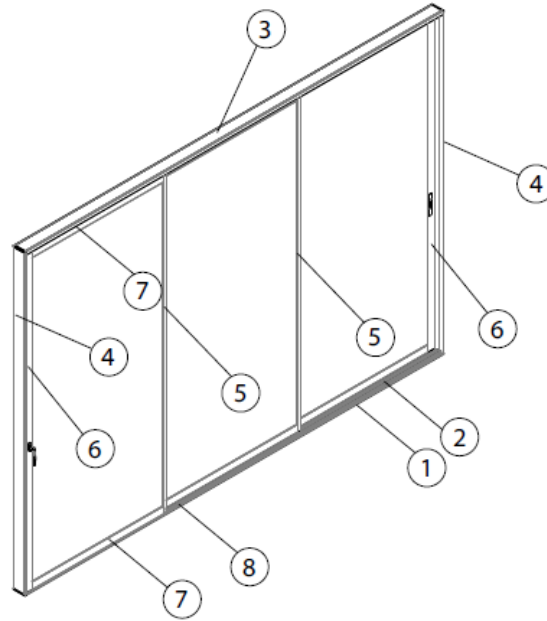

The glass system is also perfect for creating a smoking zone in the cold seasons.

Designed in an elegant way, the system is also perfect for keeping the beautiful view, even when it's cold outside, rainy or windy. It keeps the heat or the chill inside, due to its insulation system. The extruded aluminium structure and tempered glass give the system great resistance and durability. The warranty for the system is 5 years.
